# Scouts 4GreenApp

**Everybody speaks  
about sustainability,  
but what does this mean for  
your company and VET?**

**This is what the Erasmus+ project  
"Scouts4GreenApp" sets out to do over a period  
of three years. It anchors ecological, economic  
and social sustainability in vocational education  
and training and qualifies and sensitizes  
participants of learning mobilities.**

**Join us in driving positive  
change and embracing a  
sustainable future!**

# Sustainable development is taking over the world

## 5 basic tips to understand sustainable development and the 2030 Agenda

1

### What does sustainable development consist of?

Sustainable development refers to a balanced approach that aims to meet the needs of the present generation while preserving resources and opportunities for future generations.

2

### What is the Agenda 2030?

It is a global agreement signed by 193 countries in 2015, which seeks to promote sustainable development through 17 objectives, which will be measured in the next 15 years, and involve issues such as poverty reduction, environmental defence, quality education, fight against hunger, among others. These objectives must be implemented at the local, regional and global levels.

4

### How is the progress of sustainable development goals measured?

The 17 goals include 169 targets and 230 indicators that will be continuously monitored for the implementation of the agreement. The progress of these goals is reviewed annually by the UN and its member countries.

3

### How is data used to drive the sustainable development goals?

Data is key as generators of information, as they allow us to make decisions for the implementation of the goals. As a measurement element, it helps us understand how advanced countries are in their development of the SDGs. With more open and high-quality data, the organizations responsible for implementation and monitoring will be able to do their job better.

5

### Who are the actors of sustainable development?

There are actors who have specific responsibilities to lead this process worldwide, primarily governments. Civil society, private sector, media, international organisations, academia and foundations also play a crucial role in its implementation.

THE GLOBAL GOALS

Scouts  
4 Green App

# Embrace Sustainability!

## Join the Journey towards the Agenda 2030 and Transform Your Business

### Ecological Pathways

- Adopt energy-efficient practices (such as using LED lighting, optimizing heating and cooling systems, promote energy conservation awareness among employees)
- Reduce waste and promote recycling
- Promote sustainable practices
- Prefer sustainable, locally produced supplies and use of seasonal produce zero kilometer to reduce greenhouse gas emissions
- Conserve water resources

### Social Pathways

- Ensure fair wages
- Safe working conditions
- Equal opportunities for all employees
- Support local initiatives
- Implement workplace diversity and inclusion programs

### Economic Pathways

- Adopt sustainable financial practices
- Drive green innovation
- Integrate sustainability in training programs
- Foster partnerships with sustainable businesses
- Raise awareness and engage stakeholders

**Go abroad for learning mobility,  
act for sustainability - with our  
curriculum, app and challenge !**
